

The Human Sciences: Probabilities, Possibilities, and Generativity Sciences Volume I

Filesize: 2.07 MB

Reviews

It is an awesome book that we have possibly go through. It is actually writer in straightforward words and phrases and not confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

THE HUMAN SCIENCES: PROBABILITIES, POSSIBILITIES, AND GENERATIVITY SCIENCES VOLUME I

HRD Press Inc., U.S., United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Everything is constantly changing and Robert Carkhuff, author of The Human Sciences, believes changeability is the engine of possibilities. Dr. Carkhuff, one of the most-referenced scientists of the 20th century, is recognised as the father of human sciences. He has been credited with breakthroughs in our understanding of human relating, information representing and human and information generativity. In The Human Sciences, he details the accelerated movement of science from the slow, evolutionary changes of Probabilities Science through the freeing of Possibilities Science to Generativity Science. This is a powerful resource for business professionals and educators who seek to improve themselves and their organisations. Here is a preview: Part I offers an introduction to scientific models. The chapter on the human and information technologies considers the economic implications of technological innovation, the IT Innovative Solution which has dominated the economic marketplace for 50 years and the HT Generativity Solution which has made successful applications and transfers over the past 50 years. In the chapter on the human and information sciences, you will learn about information modeling and human processing and how they relate synergistically. In Part II, Dr. Carkhuff describes the science of probabilities - the thinking that dominates science - and how it no longer works by itself. You will learn how the changing conditions of the Data Age have led to Possibilities Science which is infinite and now defines our universes. In Part III, you will explore how Possibility Science will generate and innovate our continuously growing and changing universes. It is here that Dr. Carkhuff introduces Generativity Science and how it focuses exclusively on the freeing functions of possibility science and generates new universes...
