Reviews

Merely no words to clarify. I could comprehend every little thing using this created e pdf. I am just effortlessly could possibly get a enjoyment of reading through a created publication.

(Mr. Ari Powlowski)

DEFENSE LOGISTICS: UNFINISHED ACTIONS LIMIT RELIABILITY OF THE MUNITION REQUIREMENTS DETERMINATION PROCESS: GAO-01-18

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. To determine the number and type of munitions needed, the military annually evaluates its munition requirements using a multiphase analytical process. The Department of Defense (DOD) is working to ensure that the requirements determination process yields accurate numbers and the types of munitions needed to defeat threats specified in the Defense Planning Guidance. Although DOD has made progress and has identified specific areas still requiring attention, there is no clear plan with time frames for resolving key issues. Some of these issues have only been partially completed and others are in the early stages of evolution. Specifically, target templates have not been completed and munitions effectiveness data has not been updated, nor have decisions been made on more detailed warfighting scenarios and the ranking of scenarios. Consequently, the reliability of the services munitions requirements remain uncertain and could affect munitions planning, programming, budgeting, and industrial production base decisions. Until these issues are resolved and a revised Capabilities-Based Management Requirements instruction is issued, the accuracy of the munitions requirements will remain uncertain. This item ships from La Vergne, TN. Paperback.
