The driest section of Mexico's arid zone contains ample reserves of water 10 H. H. Bancroft, *Native Races of the Pacific States*, Vol. III, p. 324. in depth. The problems of deep boring have been satisfactorily solved by modern engineering. The conversion of Mexico's deserts into fertile tracts only awaits human enterprise. At a short distance beyond the northern banks of the Rio Grande, the former barren environs of the town of San Antonio have been converted into a veritable Eden within the duration of a single generation. A glimpse into the realm of pre-Columbian art affords a pleasanter outlook. The ancient Mexicans had painters and sculptors whose work has not been excelled among aboriginal American peoples. It is superior to the Neolithic productions of northern and central Europe and compares well with the work of early Mediterranean civilizations. The artistic feeling of pre-Columbian Mexicans reveals itself at its best, however, in the creation of exquisite feather mosaics. This eminently national art consists in the assembling of feathers of varying sizes and hues in patterns suggested by the artisans' taste. Such work could never have been undertaken outside of the zone of tropical forests--the lair of birds of gorgeous plumage. Hummingbirds, characterized by the metallic brilliance of their feathers, and gaudily colored parrots were systematically exploited for their...
