(mentally distinct) conceptions of Line and Number; every Vector, or directed right line in tridimensional space, having (as above shewn) a Negative Square; while every Scalar, whether it be itself a positive or a negative number, has, on the contrary, in this system as in algebra, a Positive Square. But whatever may be thought, at this stage, of the convenience or advantage of this distinction, it may be already clearly seen, that the distinction itself is a necessary part of the present Theory, indispensable to its self-coherence, and required by its internal unity. To reject this result, while other essential elements of the system were retained, would be equivalent to the absurdity of asserting, that two quadrantal and similarly directed rotations, in one common plane, did not invert the direction of the revolving line; or that two quadrants did not make one semicircle. 86.
