RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1880 Excerpt: . . . without calculation; for the chance that the mixture contains not less than  $i$  ( $m$   $n$ ) wine must be equal to the chance that it contains not more than  $i$  ( $m$   $n$ ) wine, that is, J. 5167. (By Prof. Seitz, M. A. )--A point is taken at random in the surface of a given circle, and from it a line equal in length to the radius is drawn, so as to lie wholly in the surface of the circle; find the chance that the line intersects a given diameter. Solution by Rev. H. J. Day, M. A. ; E. B. Elliott, M. A. ; and others. Let  $p$  be the distance of the random point  $P$  from the centre of the circle  $C$ ;  $c$  the radius of the circle; and  $p$  the inclination of  $CP$  to the given diameter. Then the whole range of the angles at...
